UNAUDITED MANAGEMENT ACCOUNTS FINANCIAL STATEMENTS

prepared for financial standing assessment · not statutory accounts

Document	Unaudited management accounts
Company	JNN GLOBAL LTD, trading as ETABLIX
Registered	England and Wales · Company No. 15405437
Period covered	[from] to [to]
Prepared by	[name], Managing Director
Prepared from	The company's own accounting records and bank statements
Status	UNAUDITED MANAGEMENT INFORMATION. Not statutory accounts. Not filed at Companies House. Not reviewed or reported on by an accountant.
Prepared for	Financial standing assessment on a supplier registration or dynamic purchasing system
Currency	Pounds sterling, rounded to the nearest pound

This document is issued in draft until every bracketed field is completed and it is signed and dated. An unsigned, undated accounts is treated at a selection stage as a draft, and a draft evidences nothing.

1. Basis of preparation

These are unaudited management accounts. They are not statutory accounts, they have not been filed at Companies House, and no accountant has audited, reviewed or reported on them. They are prepared by the director from the company's own accounting records and bank statements, for the purpose of a financial standing assessment, and they are presented in that form deliberately rather than dressed as something they are not.

Why not statutory accounts	JNN GLOBAL LTD has not completed two full trading years. Where accounts have been filed for a completed period they are available at Companies House and are supplied alongside this document.
-----------------------------------	--

Why a null credit score	An automated financial risk check returns no score for a company with no filed trading history. That is a consequence of the company's age rather than of its financial position, and it is the reason a manual assessment has been requested.
--------------------------------	--

Accounting convention	Historical cost. Prepared on an accruals basis: income is recognised when invoiced and costs when incurred, whether or not cash has moved.
------------------------------	--

Period	[state the period, from and to. If it is shorter than twelve months, say so here rather than leaving a reader to infer it from the dates.]
---------------	--

Comparatives	[state whether a prior period is shown. For a first period there is none, and saying so is better than an empty column.]
---------------------	--

Every figure in this document can be traced to a bank statement, an invoice or a receipt. Section 8 names the record behind each line so an assessor can test any of it rather than take it on trust.

2. Profit and loss account

For the period stated in the control table.

	£	Basis
TURNOVER	[]	Services invoiced in the period
Cost of sales		
Subcontractors	[]	Subcontract invoices for work in the period
Materials, plant and hire	[]	Attributable to delivered work
Total cost of sales	[]	Sum of the above
GROSS PROFIT / (LOSS)	[]	Turnover less cost of sales
Administrative expenses		
Director's remuneration and employer's NIC	[]	Payroll records
Insurance	[]	Policy schedules and premiums paid
Professional and accountancy fees	[]	Accountant, formation, legal, bid support
Software, subscriptions and hosting	[]	Invoices and card statements
Equipment below the capitalisation threshold	[]	Written off as incurred
Marketing, website and print	[]	Invoices
Travel and subsistence	[]	Mileage log and receipts
Other administrative costs	[]	Itemise anything material in a note
Total administrative expenses	[]	Sum of the above
OPERATING PROFIT / (LOSS)	[]	Gross profit less administrative expenses
Interest receivable	[]	Bank statements
Interest payable	[]	Bank statements and loan agreements
PROFIT / (LOSS) BEFORE TAXATION	[]	
Taxation	[]	Corporation tax charge for the period
PROFIT / (LOSS) FOR THE PERIOD	[]	Carries to retained earnings at section 3

A loss in an early period is not a finding against a company and an assessor does not read it as one. What an assessor reads badly is a loss presented as a profit by leaving something out. Include every cost incurred in the period, including the ones settled personally and reclaimed.

3. Statement of financial position

As at the period end date stated in the control table.

	£	Basis
FIXED ASSETS		
Tangible assets, net of depreciation	[]	Asset register
Total fixed assets	[]	
CURRENT ASSETS		
Trade debtors	[]	Invoices issued and unpaid at the period end
Other debtors and prepayments	[]	Prepaid insurance, subscriptions
Cash at bank and in hand	[]	Bank statement balance at the period end date
Total current assets	[]	
CREDITORS: amounts falling due within one year		
Trade creditors	[]	Supplier invoices received and unpaid
Taxation and social security	[]	PAYE, NIC, VAT and corporation tax due
Accruals and other creditors	[]	Costs incurred and not yet invoiced to us
Director's loan account	[]	Amounts owed to the director
Total current liabilities	[]	
NET CURRENT ASSETS / (LIABILITIES)	[]	Current assets less current liabilities
TOTAL ASSETS LESS CURRENT LIABILITIES	[]	
CREDITORS: falling due after more than one year	[]	Loans and finance beyond twelve months
NET ASSETS / (LIABILITIES)	[]	THIS IS THE FIGURE AN ASSESSOR LOOKS FOR FIRST
CAPITAL AND RESERVES		
Called up share capital	[]	Register of members
Profit and loss account (retained earnings)	[]	Brought forward plus the result at section 2
TOTAL EQUITY	[]	MUST EQUAL NET ASSETS ABOVE

Total equity must equal net assets. If it does not, the statements do not balance and an assessor will see it in seconds. The workbook at ETABLIX-financial-statements.xlsx tests this automatically — its first cross-check goes red when the two differ. Transcribe from a workbook whose checks read OK.

4. Turnover statement

Requested separately by some assessments, and stated here so it does not have to be extracted from the profit and loss account.

Period	Turnover (£)	Basis
[current period, from and to]	[]	Services invoiced in the period
[prior period, or: no prior trading period]	[]	
[period before that, or: none]	[]	

Where there is no prior period, write 'No prior trading period — company incorporated [date]' rather than leaving the row blank or entering nil. A nil figure and an absent period are different facts and an assessor treats them differently.

5. Cash flow statement

	£	Basis
Cash at bank at the start of the period	[]	Opening bank statement balance
Operating activities		
Receipts from customers	[]	Bank statements
Payments to suppliers and subcontractors	[]	Bank statements
Payments to and on behalf of the director	[]	Payroll and bank statements
Other operating payments	[]	Bank statements
Net cash from operating activities	[]	
Investing activities		
Purchase of equipment	[]	Invoices and bank statements
Financing activities		
Share capital introduced	[]	Bank statements
Director's loan advanced / (repaid)	[]	Director's loan account
NET MOVEMENT IN CASH	[]	Sum of the three activities above
Cash at bank at the end of the period	[]	MUST EQUAL the closing bank statement balance

The closing figure must equal the bank statement on the period end date, to the penny. It is the easiest line in the document to verify and the one an assessor is most likely to check, because a bank statement is the only document here that nobody in the company wrote.

6. Notes

6.1 Going concern

[State the position honestly, in three or four sentences. What the company's cash position is, what its committed outgoings are, and what the director's intention and ability to support it are. If there is a director's loan facility or an undertaking not to demand repayment, say so and say for how long — that is the single most useful sentence in this section for an assessor, and an undertaking with no term stated is worth much less than one with a date.]

6.2 Related party transactions

[Transactions with the director and with any company under common control: loans, remuneration, expenses reclaimed, use of personal assets. State the amounts and the terms. An assessor expects related party transactions in a company of this size and reads their absence as an omission rather than as a virtue.]

6.3 Events after the period end

[Anything material between the period end and the date of signing: insurance bound, contracts won, funding introduced, a change in circumstances. If there is nothing material, write that there is nothing material.]

6.4 Employees

The company has one employee, the director. Employers' liability insurance is not compulsory under the Employers' Liability (Compulsory Insurance) Act 1969 for a company whose only employee is a director holding fifty per cent or more of the issued share capital. Where a buyer requires that cover as a contract condition, it is a commercial requirement rather than a statutory one and is addressed separately.

7. Director's statement and approval

I confirm that these management accounts have been prepared from the accounting records of JNN GLOBAL LTD and that, to the best of my knowledge and belief, they give a true reflection of the company's income, expenditure, assets and liabilities for the period stated.

I confirm that they are UNAUDITED, that they are not statutory accounts, that they have not been filed at Companies House, and that no accountant has audited, reviewed or reported on them. They are supplied for the purpose of a financial standing assessment and should not be relied upon for any other purpose.

Title	Director, JNN GLOBAL LTD
Date	[date]

8. Where each figure comes from

Not part of the statements. Kept with them so any line can be traced to a source document if an assessor asks, and so the next period takes an evening rather than a week.

Line	The record	The test
Turnover	Sales invoices raised in the period.	The total of invoices dated within the period, whether paid or not. Not the total of receipts — those belong in the cash flow statement.
Trade debtors	Sales invoices issued and unpaid at the period end.	Age them. A debtor older than ninety days is a question an assessor may ask, and a prepared answer is better than a surprised one.
Cash at bank	Bank statement on the period end date.	To the penny. This is the anchor for the whole document.
Trade creditors	Supplier invoices received and unpaid at the period end.	Include anything received after the period end that relates to work done inside it.
Accruals	Costs incurred but not yet invoiced to the company.	The line most often missed, and its absence overstates profit.
Director's loan account	A running record of money in and out between the director and the company.	Reconcile it. An unreconciled director's loan account is the most common weakness in accounts at this scale.
Taxation and social security	HMRC account: PAYE, NIC, VAT, corporation tax.	Take it from the HMRC portal rather than from an estimate.

Complete ETABLIX-financial-statements.xlsx first and confirm its three cross-checks read OK. Then transcribe the totals into this document. Deriving the same figures twice by two routes is how a transcription error reaches an assessor without anyone noticing.

Approval

This policy is a live document. It is reviewed on the dates recorded on the cover and reissued whenever the work, the people or the law changes.
